IRI.LAMP

Full range universal LED flashing light

IRI.LAMP

The most exclusive LED flashing light on the market.

IRI.LAMP is provided with the blinking function as standard, but it can be installed also on systems that already have this function (useful for maintenance interventions on old installations)

Universal LED flashing light. Only one model to manage all power supplies from 20 to 255 V both alternate or direct.

Provided of a built-in aerial.

Only 1 W of maximum power absorbed: one of the lower on the market!

It is also possible to use it as courtesy light or fix light.

IRI.LAMP is projected to make the installation easier and quicker.

Possibility of wall mounting by means of its included support.

iride
passione italiana

Our eyes are the organs through which we enter into contact with reality, experience our emotions, construct our future.

This was Benincà's inspiration for its new **IRIDE** line.

We have always made products that enable us to improve our lives, making places and people safe. Every day we envisage our products as vehicles through which to experience the world, and this "vehicle" concept is the inspiration behind the accessories in the new Benincà line.
